Every child deserves a fair start in life.

AÇEV works to make sure every child is safe, healthy, happy, and learning. We develop and implement evidence-based educational programs for children, parents, and young women in need across the country.

Beyond educational programs and field activities, we do awareness building and advocacy work to raise awareness and build support for our work.

In fact, all of our activities center on quality education in early childhood, gender equality, the family's role in raising the next generation, and life-long learning; all of which are United Nations Sustainable Development Goals.

Almost one million beneficiaries have participated in our training programs and we continue to grow with our volunteer trainers, tens of thousands of individual donors, and ever expanding collaborative network.

We know a child's early years lay the foundations for a strong future. Building that future starts from day one.

MESSAGE FROM THE PRESIDENT

Our main goal at AÇEV is to contribute to a stronger society and a better future, informed by science.

Dear Friends of AÇEV,

As we left 2017 behind, we welcomed the new year with our ever growing hope for a better future. We have sought, for almost quarter of a century, ways to contribute better to social welfare, in an effort to keep our hopes alive and nurture new ones; striving to always bring them to reality. Our main goal at AÇEV is to contribute to a stronger society and a better future, informed by science.

We strive to demonstrate that social sciences are not abstract, but instead accessible, and can create change towards social well-being, basing all of our activities on the approach that forms AÇEV's founding philosophy, "Science is not only for the sake of science; it must as well serve the society."

Since the day we founded AÇEV, scientific evidence regarding the significant impact of early childhood education on society's development has set our course moving forward. Therefore, we consider educational and awareness raising activities for young children and the families who constitute their immediate environment, as the main necessity for society's transformation. Our dissemination efforts prioritize children and families in need, as we know these programs have even higher impact on these populations.

We have realized this mission, which has not changed in 24 years, through projects and activities that we diversify each year. This year, we conducted activities on the levels of children, family and the society, focusing on improving care and educational services for children in

need; supporting the adjustment and school readiness of Syrian refugee children; promoting the role of fathers in child development; supporting multi-faceted development of young women, and promoting gender equality in collaboration with our partners.

I believe that in today's world a society that aims for the highest good of young children, creating equal opportunities through educational resources founded upon scientific and universal values, is indispensable for the well-being of all. Serving the society based on an accurate needs assessment will create hope as well as opportunities for sustainable peace, justice, and well-being.

I extend my utmost gratitude to our countless stakeholders, who have made this work possible and contributed immensely to our success, including our trainers, volunteers, collaborating organizations, supporters, and consultants.

I hope that our partnership lasts for years to come, ensuring that every young child is safe, healthy, happy, and learning.

With love and respect,

Ayşen Özyeğin
President of the Board

REDUCING SOCIAL INEQUALITIES AND THEIR INTERGENERATIONAL TRANSFER THROUGH “**EARLY CHILDHOOD EDUCATION**”

Through the starting point to all of our activities, Early Childhood Education, we aim to make use of the opportunities for more optimal development during the first 6 years of life.

AÇEV: ON THE CUSP OF QUARTER-CENTURY

DEDICATED TO SOCIETY'S DEVELOPMENT

As an institution that generates, implements, and ultimately disseminates scientific knowledge, we aim for science to serve the society.

First steps towards establishment...

AÇEV's story started with AÇEP (MOCEP), the Mother Child Education Program, an alternative preschool model created upon an identified inadequacy in preschool education in Turkey. AÇEV was founded as an attempt to ensure AÇEP's effectiveness, high quality, and sustainability. A research project conducted at Boğaziçi University through 1982 - 1986 on the educational status of preschool children by professors Dr. Sevdâ Bekman, Dr. Çiğdem Kağıtçıbaşı, and Dr. Diane Sunar demonstrated that a majority of children in Turkey did not receive any formal education during early childhood. To address this need, the Mother-Child Education Program was developed by the researchers and began implementation. With President Ayşen Özyeğin joining this team of researchers, the work conducted assumes an institutional structure, and in 1993, becomes the Mother Child Education Foundation (AÇEV).

...and from then on, dedicated to society's development.

Basing its work on an "ecological" approach, AÇEV has developed programs that aim to contribute to development through educating the environment--ecology--of the developing individual: To support the preschool child and its immediate surroundings, AÇEV developed several programs in succession, addressing mothers' and fathers' education, preschool education, women's literacy, and women's empowerment. AÇEV has kept its stance at the intersection of science and intervention/implementation, maintaining the monitoring and evaluation element in all of its programs. Our scientific research has consistently informed implementation.

AÇEV, thereby, has become a prominent example of science serving the society through generating, implementing, and ultimately disseminating scientific knowledge. In AÇEV's work, science serves the society by creating equal access through early childhood interventions and advocacy, based on the scientific evidence demonstrating how early childhood is the most critical developmental period, while supporting these interventions with the evidence-base provided by research.

Within the framework of our global collaborations, we continue to support the UN's broader objectives including the UN Sustainable Development Goals and Global Compact Principles. We will always continue to invest in a happier and more hopeful future and the well-being of all people.

Nalan Yalçın, General Manager

Conducting implementations through national and international partnerships, AÇEV receives human resources and logistical support from partnering institutions. It acts in collaboration with local partners to assess the particular needs of each target population. AÇEV's evidence-based programs have become best practices through academic, public, and civil partnerships, and paved the way for educational policy, also contributing directly to the government's own family training curriculum. AÇEV also has international partnerships through which it implements its programs and transfers know-how abroad.

SOCIAL TRANSFORMATION THROUGH GENDER EQUALITY

In our educational activities, AÇEV draws attention to the socialization of gender roles in the early stages of life. We discuss gender with parents within the framework of our experience in child development, drawing attention to egalitarian parenting and adult roles in breaking the gender roles that have been internalized from childhood into adulthood through environmental influences.

AÇEV'S MILESTONES

1993

Mother Child Education Foundation (AÇEV) is officially founded, opening its first office in İstanbul. It begins to implement the 25-week Mother Child Education Program (MOCEF) in collaboration with Turkey's Ministry of National Education.

1994

- Now focused on mother's needs, AÇEV begins developing an adult literacy program and signs a protocol to partner with Turkey's Ministry of National Education in its implementation.

1995

- Implementation of the Functional Adult Literacy Program begins.

1996

- In response to the demand from mothers, development of the Father Support Program begins and first pilot implementations follow.
- AÇEV programs abroad: AÇEV's program for mothers begins its first implementation with the Turkish guest workers in the Netherlands.

1997

- AÇEV joins the "Consultative Group on Early Childhood Care and Development" and is designated its "Central Asia Representative for Early Childhood Education."

1998

- In response to overseas demand, MOCEF begins implementations in English in Bahrain.

1999

Designed for implementation with preschool teachers, the Preschool Parent Child Education Program (PPCEP) is developed.

2000

- Implementations of the Mother Child Education Program begin in Belgium and France, and the Mother Support Program in Germany.

2001

AÇEV receives the "Millennium Award" from the Women's Health Commission (KASAKOM), and the "Most Effective Foundation of the Year Award" from the Yeni Olgu Art and Activity Group.

2002

- Developed in collaboration with Turkish Radio and Television (TRT), and geared to preschool-aged children and their families, the television program "Will You Play with Me?" begins airing on TRT channels. The program is elected "Best Children's Program" by the Radio-Television Journalists' Association, and receives "Children's TV Program of the Year Award" from YA-PA Publications.

2003

- In Alipaşa, Diyarbakır, AÇEV Education Center for Children and Families is founded. Implementations of the Preschool Education Program and its complementary component, the Mother Support Program, are initiated in Diyarbakır under the name of Summer Preschools.

2004

- AÇEV's Father Support Program expands its reach to 16 provinces in Turkey through various partnerships and its first overseas implementation begins in Germany with the Turkish immigrant families.

2005

- AÇEV launches the "7 is Too Late" Campaign in collaboration with six other NGOs to raise public awareness, generate support for, and develop policies on the importance of early childhood education.

2006

- AÇEV's Functional Adult Literacy Program (FALP) receives UNESCO's "King Sejong Literacy Award" given to selected literacy projects worldwide.
- Literacy education is broadcast on television in collaboration with TV channel Kanal D in a 65-episode project titled "Our Classroom."

2007

- The second phase of the "7 is Too Late" campaign continues with new content for newspaper/magazine ads and TV/radio spots. The 7cokgec.org (7istoolate.org) website is launched with detailed information on the campaign as well as information for families on early childhood.

2008

- A protocol is signed between AÇEV and the Center on the Developing Child (HCDC) attached to Harvard University's Graduate School of Education.

2009

- The “First Step Ahead Project” is launched, funded by the Vodafone Turkey Foundation.

2010

- AÇEV is honored with the The World Innovation Summit for Education (WISE) award for its Mother Child Education Program (MOCEP).

2011

- A computer-based literacy program, “Read and Write at AÇEV” is developed in line with AÇEV’s computer-aided instruction objectives.
- AÇEV’s literacy education is taken to the TV screen with the TV show “Life is Better Reading” in partnership with ZTV.

2012

- “You Are My Father” Campaign is launched within the framework of the Father Support Program and continues for 2 years.
- To support families in the aftermath of an earthquake in the province of Van, the Post-Trauma Family Counseling Center is established in collaboration with the Ministry of Family and Social Policies Ministry and the Psychological Trauma and Crisis Intervention, Research, and Training Association (PAYE) and transferred to Van Yüzüncü Yıl University in 2013.

2013

- AÇEV receives the “EMPower Champions of Youth Award” for its literacy work geared to young women.
- The Early Childhood Peace Consortium is organized as part of AÇEV’s collaboration with Yale University.

2014

- In line with its “First Step Ahead Project” in collaboration with the Vodafone Turkey Foundation to promote quality preschool education, AÇEV launches the “First 6 Years” mobile application and provides parents with information on child development through their mobile phones.
- AÇEV is honored with another award for its literacy work from the U.S. Library of Congress, one of the oldest and most esteemed institutions in the US.
- AÇEV’s Summer Preschools Program, implemented in Southeastern Turkey for the past 12 years, is launched as a pilot project in Laos in Summer 2014 through a collaboration with Plan International.

2015

- AÇEV becomes one of the partners in the “I Support Gender Equality for My Country” project run by Koç Holding, and joint work begins on creating awareness on this issue at all levels of society.
- On June 11, 2015, AÇEV, Yale University, and UNICEF host the “Pathways to Peace: Early Childhood and Families Conference” in Istanbul.

2016

- Pilot implementations of a new women’s empowerment program called “POWER” begin, aiming for the multi-faceted development of young women, supported by UNWomen’s Fund for Gender Equality.
- In cooperation with the Istanbul Provincial Directorate of National Education, pilot implementations of the “Summer Preschools for Syrian Children” Program are conducted with the support of Plan International and Siemens Turkey.

2017

- AÇEV launches findings of the most comprehensive research study ever conducted on fatherhood in Turkey and a national Fatherhood Campaign—“Fatherhood Comes First”—to promote the message that fathers matter deeply to child development.
- AÇEV publishes the report on “Early Childhood Care and Enrollment in Preschool Education” in collaboration with the Education Reform Initiative (ERI).
- AÇEV publishes the “State of 0-6 Children” report, which analyzes the current state of children aged 0 to 6 in Turkey.

SUPPORT FOR CHILD DEVELOPMENT THROUGH PROMOTING “**INVOLVED FATHERHOOD**”

In addition to our field implementations of the Father Support Program, we have successfully conducted the “Fatherhood First” campaign, framed by a holistic approach that involves advocacy and awareness raising.

YOUNG WOMEN TOO, **HAVE A SAY**

AÇEV is channeling its efforts towards a multi-dimensional empowerment of women and their increased active participation in the social sphere, to increase women's literacy levels --in line with this new definition-- and strengthen young women to become more active in life.

THE WORK OF AÇEV

EARLY CHILDHOOD EDUCATION IS THE BASIS FOR A HAPPY AND SUCCESSFUL ADULthood.

Early childhood, i.e., the first 6 years of life, is a time when children have extraordinary opportunities for positive development.

EARLY CHILDHOOD PROGRAMS

Early childhood, i.e., the first 6 years of life, is a time when children have extraordinary opportunities for positive development. Early years constitute a time when the brain develops at its fastest and children benefit the most from interactions with their environment. It is also a time when learning is at its peak; where basic habits, cognitive abilities are formed and shaped. This period of life forms the basis for healthy development, a happy and successful adulthood, and a fair and equitable society.

Early childhood education interventions targeting the community's disadvantaged population play an important role in reducing inequalities and, in particular, intergenerational transfer of these inequalities. Within this scope, AÇEV provides educational programs for young children and parents.

Mother-Child Education Program (MOCEP)

MOCEP is an evidence-based, home-based educational program for children 5 years of age, who have not received preschool education, and their mothers, empowering mothers in providing support to their children's education at home. The program was created to strengthen mothers in their parenting role, while also supporting their contributions to their children's cognitive, physical, and socioemotional development.

Child Education Program (CEP)

With the Child Education Program (CEP), developed for children aged 4 and higher, we aim to increase the school readiness of children who are socioeconomically disadvantaged and deprived of the necessary support in their developmental environment, through preliteracy activities and overall support for their linguistic development. The CEP material also aims to support the habit of doing schoolwork and a sense of confidence in children.

Summer Preschool Programs

AÇEV has developed an accelerated Preschool Education Program (PEP) for 4+ year-old children in regions with identified need to provide equal opportunity in education, a better future for children, and to raise the awareness in their families. The program supports children with no previous preschool education and aims to inform mothers on supporting their children to gain basic academic skills. We also conduct mother support groups with mothers of children attending this program.

Early childhood education interventions targeting the community's disadvantaged population play an important role in reducing inequalities.

“The First 6 Years” Mobile Application

The “First Six Years” Mobile Application Project was developed as a collaboration between the Vodafone Foundation of Turkey and AÇEV with the aim of providing equal opportunity in access to information through mobile technology. In Turkey, where internet access is becoming more widespread and smart phones and tablets are increasingly used, we aim for families to learn about child development and parenting skills using these technological tools. The “First Six Years” mobile application provides useful, practical, and immediate support to all families, and serves as a comprehensive “child raising guide,” which includes up-to-date information on child development.

Project “Reading for Tomorrow”

Research shows that reading books with parents helps expand children’s vocabulary and knowledge

of the alphabet, supporting the overall development of children’s verbal language skills. According to the well-known 1995 study by Hart-Risley, there is a “30 million word gap” between children from low- and high-income families in terms of the number of words children hear in the household. In line with these facts, AÇEV conducts its “Reading for Tomorrow” program for children in need. During the six-week project, volunteers read books to children in an animated manner, and the books are given to children at the end of the project.

Acevokuloncesi.org

We started the website “AÇEV Preschool” to support preschool teachers, a critical component of quality preschool education. The website features a comprehensive activity pool as a resource for preschool teachers, and is constantly updated with examples of educational tools, visual elements and videos.

PARENTING PROGRAMS

MOTHER SUPPORT PROGRAM (MSP)

The MSP was created to support mothers in their parenting roles, to raise awareness on child development, to strengthen their communication with their children, and to inform mothers about their rights and healthy living. They also serve to provide children with a supportive home environment where the mother has higher self-confidence, an increased sensitivity for child development, hence an increased role of an educator in their children's lives.

Father Support Program (FSP)

FSP aims to support fathers in assuming an active role and responsibility in child development. Constantly updated in line with scientific advancements and social needs, the program creates positive changes in fathers' child rearing attitudes. Significant increases are seen in participating fathers' knowledge in various ways they can support their children's development, as well as their awareness of the concept of involved fatherhood.

PROGRAMS FOR YOUNG WOMEN

The POWER Program

AÇEV, with its long-standing experience in conducting educational activities in the country for women who are not literate, has now restructured these programs in line with the changing definition of literacy, channeling its efforts more towards a multi-dimensional empowerment of women and their increased active participation in the social sphere, creating the POWER program to increase women's literacy levels --in line with this new definition-- and strengthen young women to become more active in life. The target audience for this training is women aged 18 to 35. Among the topics covered are personal development, self care, women's labor, and participation in decision making.

We introduced our "Acevdeokuyaz.org"

AÇEV developed the portal www.acevdeokuyaz.org to serve as an online literacy education tool for adults, aiming to reach wider audiences with its work on literacy. There are over 16,000 registered users across the country using the free online platform, which aims to increase literacy skills for all adults, including those with no literacy.

Addressing gender equality has remained one of the main objectives of AÇEV programs.

SEMINARS ON GENDER

Awareness Raising Activities for Social Transformation & Community Information Seminars

Addressing gender equality has remained one of the main objectives of AÇEV programs. To this end, we have conducted seminars on gender equality with parents, teachers, and school administrators, who have important roles in child development and education. We have also conducted seminars for private sector employees aiming to increase awareness and change behavior in the corporate world.

AÇEV-Supported Centers

Melek Erman Köni Education and Culture Center (MEK)

To provide comprehensive educational support to families, and specifically women and children, who migrate to Istanbul, the MEK Center was founded with the leadership of Melek Erman Köni in Esenler, Istanbul in 2007. The center serves families with limited opportunities and a need for educational support, providing them with a variety of free educational programs. AÇEV's educational programs are implemented at this center with trainings provided to children, parents, and women.

Diyarbakır Family and Child Education Center

The center was opened in 2002 in the Alipaşa district of Diyarbakır, where the most disadvantaged populations reside, and supported by Boeing Turkey since 2010. Due to urban transformation work in the Alipaşa district, the center was moved to the Sur district in 2018. We plan to conduct workshops, preschool programs, a child and parent library, and play groups at the new center. We

aim to support the development of this district through implementations of AÇEV's programs for mothers, fathers, and young women.

Kınık and Poyracık Family and Children's Centers

Following the mining accident in Soma, AÇEV founded the Kınık Family and Children's Center in collaboration with the Kınık Municipality. AÇEV's programs are implemented in the 2 preschool classrooms of the center. Through programs offered at the center, children prepare for primary school education, and mothers acquire skills to support their children's development. Upon the success of the Kınık Municipality Family and Children's Center, a new Family and Children's Center in the Poyracık District started its operations with educational support from AÇEV.

İz Child Development Center

İz Child Development Center functions as an experienced and accessible model, providing high quality education that supports every child's development during early childhood.

Having developed evidence-based educational models, methods, and projects for early childhood, AÇEV put into practice its long-standing experience in the field through the İz Child Development Center to provide the right start for preschool children.

İz Child Development Center, whose educational model and specialist teams were created with AÇEV's support, serves 2-5-year-old children inside Özyeğin University's Çekmeköy campus.

2017 EDUCATIONAL ACTIVITIES

IN 2017, AÇEV WORKED YET AGAIN TO CREATE A BETTER FUTURE FOR CHILDREN.

Early Childhood Education helps to provides equal access to children with limited resources.

Mother Support Program

Volunteer trainers implemented the program in AÇEV's centers, reaching a total of 144 mothers in 8 groups in İstanbul, Bursa and İzmir during the first half of 2017.

We built new partnerships with local administrations and various institutions to meet the field's needs through this program. Also, through implementations at the Melek Erman Köni Education and Culture Center, and the centers in Kınık and Poyracık, we reached 546 mothers in 28 groups during the second half of 2017. Therefore, we reached 690 mothers through 36 Mother Support Program groups throughout 2017.

Project "Reading for Tomorrow"

In the first half of 2017, we opened a total of 77 groups with this program and reached 1405 children in İstanbul, İzmir and Diyarbakır. We conducted our implementations at partnering local administrations, civil society organizations, and public primary schools. In the second half of 2017, we reached 2564 children via 145 reading groups in İstanbul, İzmir and Diyarbakır. Therefore, during 2017 we conducted reading activities with 3.969 children in 222 reading groups.

AÇEV and Hüsnü M. Özyeğin Foundation (HMOV) Collaboration in Rural Education - the Kilis Implementation

AÇEV supports Hüsnü M. Özyeğin Foundation's work in Kilis through implementing our programs in the region.

During the first half of 2017, Adult Reading Groups and the Rights Module were conducted, reaching a total of 59 women in 7 villages. Upon women's request in the Yeşiloba village, an AÇEV library was established in the village's public school building. The village's young women established a system for installation, record keeping and tracking, and started making use of the library. In addition to the reading activities, film

screenings were organized with the participation of 55 women in 5 villages. Women in these villages took part in various additional trainings provided by HMOV, including record keeping and tracking on the computer. Furthermore, implementations of Project "Reading

Future" and "Having Fun Learning" were conducted by AÇEV's field advisor as well as young girls from the villages who were trained as facilitators for this program.

In the second half of 2017, AÇEV's Summer Preschool Program was implemented in 2 classrooms in Kilis with the participation of 30 children. During the Summer Preschools, Adult Reading Groups with women continued in 7 villages, reaching 55 women.

"The First 6 Years" Mobile Application

In 2017 we upgraded the software and design of the app, creating a more user-friendly and up-to-date version. We added the "New Mom's Assistant" and "Health Card" screens into the app. The app reached a total download score of 366,594 with 123, 351 new users. We continue our work on the fathers' content for the app, aiming to integrate the "Fathers are Here" section in 2018.

GAP (Southeastern Anatolia Project) Administration Summer Preschools Program and Home Visits for Syrian Children under the UNICEF Program Cooperation Agreement

Summer Preschools

During the summer of 2017, we implemented our 10-week Preschool Education Program, specifically designed for the Summer Preschool Project, in the 9 GAP provinces and Hatay, a southern province of Turkey with a high Syrian refugee population, with UNICEF's financial support and the partnership of the GAP Administration and the Development Foundation of Turkey.

To implement this project, we provided 125 new teachers with a 10-day Preschool Program trainers' training. We supported the total of 136 trainers through supervision by 31 AÇEV supervisors during implementation.

In accordance with the needs assessed in the field, 547 local children in 32 classrooms and 1858 Syrian children in 104 classrooms attended the 10-week preschool program. Therefore, a total of 2405 children benefited from AÇEV's preschool education.

We conducted an impact evaluation, where we assessed the impact of the Preschool Education Program, which was implemented at the Summer Preschools, on multiple aspects of children's development. We can summarize the findings as follows;

In 2017 we upgraded the software and design of the app, creating a more user-friendly and up-to-date version.

- The 9-week intervention has created a significant and positive impact, in favor of children, on the 3 developmental areas (Turkish linguistic development, cognitive development and social-emotional development) and corresponding skills (verbal and numeracy skills, language fluency, expressive language, self-expression, emotional literacy, and social communication).
- The study showed that the main predictor of this significant difference was attendance in the program. The pre- and posttest comparisons between the intervention and control groups clearly demonstrated that the development in children that happened as a result of attending the program is significantly higher than the expected level of development that happen without attending the program. Taking into consideration the level of improvements that participating children demonstrated in all of the developmental areas, we concluded that the program promoted children's school readiness.
- The program, therefore, supports the school readiness of psychosocially vulnerable children living in low socioeconomic conditions, disadvantaged contexts, or coming from at-risk backgrounds, such as war or migration.
- The program has reached children coming from limited family backgrounds (in terms of employment and income status) and deprived home environments (lacking resources, such as books or toys; high in household population and low on individual space) and created significant and positive changes in their school readiness, as well as overall life experiences.

We have reached 2.797 mothers and 3.275 children in the 9 GAP provinces and in Hatay.

Therefore, the program achieved to provide these children with equal access in preschool education, bringing them closer to their mid- and high socioeconomic peers in terms of school readiness.

Home Visits

Home visitors and supervisors, who attended AÇEV's Capacity Building Training in the first half of 2017, reached 1015 mothers and 1371 children through their field work.

With the goal of disseminating the program, we trained home visitors and supervisors in 3 trainers' trainings in the second half of 2017. The team created thanks to all of this capacity building work reached **2797 mothers and 3275 children in the 9 GAP provinces and in Hatay.**

Research and Advocacy on Early Childhood Care and Education

We prepared and disseminated several publications that review the current state in Turkey regarding early childhood policies and services;

- The State of 0-6 Children in Turkey Report
- Early Childhood Care and Enrollment in Preschool Education in Turkey Background and Summary Report

- Two publications on our work with Syrian children, aiming to support project and policy development in promoting these children's school readiness;
 - 1- "Summer Preschools for Syrian Children: A Practitioner's Guide for Improving School Readiness" in early 2017
 - 2- The impact evaluation for the Summer Preschools Project for Syrian and local children implemented with UNICEF's financial support and the partnership of the GAP Administration and the Development Foundation of Turkey

Father Support Program (FSP)

In 2017, we implemented the Father Support Program with our volunteer trainer base through various partnerships. We conducted the FSP groups with funds from the UN Trust Fund to End Violence against Women and the Yapı Kredi Bank. We reached a total of 3666 fathers in 280 FSP groups, **with 120 groups in the first and 160 groups in the second half of 2017.**

Training of Trainers

For the implementation and dissemination of the FSP, we conducted trainers' trainings, as well as refresher trainings for existing trainers. Through these trainings, we supported the FSP volunteers on their motivation for volunteering and skill development on the advocacy of involved fatherhood.

FSP Theoretical Program Trainers' Training

We conducted the training 14 through 25 August 2017 in the Güre district of Balıkesir. Thirty eight trainers attended these trainings from 11 different provinces, with 26 volunteers from Bursa, Eskişehir, İstanbul, İzmir and Samsun, and 12 volunteers from Ankara, Aydın, Antalya, Batman, Çanakkale and Trabzon.

FSP Refresher Training

With a total of 95 trainers from Eskişehir, Samsun, Bursa, İstanbul and İzmir, we conducted the refresher training 21 through 23 August 2017. As part of this training, we shared the findings of our State of Turkey's Fathers research study, aiming to build capacity for local advocacy. During the training, the trainers found the opportunity to plan activities for local advocacy of involved fatherhood, which they implemented after the training.

Refresher Training for Field Supervisors

In November 2017, we conducted a refresher training with the participation of 34 field supervisors. During the training, we worked on not only supervisory skills but also volunteerism and advocacy, and had several meetings with the group leaders.

Monitoring and Evaluation

We conducted monitoring and evaluation on the FSP between April and July 2017, as part of YADA Foundation's impact evaluation study. The study demonstrated positive changes in program participants on issues of gender equality, attitudes towards parental responsibilities, and fathers' sharing of household duties.

Informational Seminars

In 2017, we conducted 11 seminars mostly in response to individual requests from our volunteer trainers, their contacts, or municipalities' kindergartens. Also, we conducted a total of 9 Community Information Seminars in different provinces and venues including municipalities, work places, and kindergartens.

Advocacy and Local Networks

In 2017, we conducted a series of research studies on "involved fatherhood," whose findings informed our advocacy strategies. Alongside our implementations of the Father Support Program, we conducted advocacy through a holistic approach. Important steps in this approach were the formation of local advocacy networks and their actual advocacy efforts on involved fatherhood, as well as research and campaigns on fatherhood.

As part of the "Fathers are Here for Gender Equality" Project, funded by the UN Trust Fund, we conducted advocacy workshops to build capacity for advocacy in both the AÇEV headquarters team and Father Support

2017 EDUCATIONAL ACTIVITIES

Program's field team. As a result of this work, local advocacy networks were formed:

- “Bergama Involved Fathers Association,” founded by the fathers participating in FSP groups conducted by our FSP trainer in Bergama,
- “The Good Fathers Platform,” founded by a group of FSP trainers in Istanbul and participants in their FSP groups,
- “The Involved and Responsible Fatherhood Platform” founded by our FSP trainers and participating fathers in Samsun

To support these emerging networks, we conducted the “Local Formations in Support of Involved Fatherhood Workshop” in December 2017. Our aim was for these emerging groups, who have volunteered for advocacy, to meet one another, reach a consensus regarding key concepts on involved fatherhood and advocacy, and gain an insight into future activities.

Fathers Are Here for Gender Equality Project in collaboration with the UN Trust Fund to End Violence against Women

This project, spanning 2016-2018, includes both program implementations for fathers and advocacy and campaigns on involved fatherhood and men's role in the promotion of gender equality.

Project Activities

With this project, we aim to enable fathers to have a better understanding of their role and assume more responsibility in their children's care development, while at the same time mobilizing all actors who can be influential in the transformation of fatherhood.

Consequently, we have placed “involved fatherhood” on the agenda through various activities including awareness-raising and educational activities, as well as social media campaigns. The project is implemented in Eskişehir, Samsun, Bursa, İstanbul, and İzmir. In 2017, as part of this project, we started 190 groups of the Father Support Program, conducting face-to-face training with 2501 fathers.

Visibility for the Project

Fatherhood First Campaign

The time fathers spend with their children and the bond they establish have a tremendous effect on children's cognitive and physical development, as well as their social and emotional capacity. We at AÇEV advocate for fatherhood being the most important role of a father. To this end, we started our “Fatherhood First” campaign to create supportive environments for involved fatherhood in the families, neighborhoods, friend circles, and workplaces.

As part of our “Fatherhood First” campaign, we created materials with involved fatherhood messages, such as banners, billboards, t-shirts, brochures, roll-ups, balloons, and stickers, distributing these materials to the local FSP leaders and municipalities. These materials were then disseminated in these provinces by the local platforms established by the FSP graduates themselves, such as the Good Fathers Platform and the Involved Fathers Association. A large number of the local municipalities supported the “Fatherhood First” campaign via billboards and banners. The brochures and other materials were used in Fathers' Day festivities, certificate ceremonies for FSP graduation, and parades, helping to raise awareness on a wide scale.

Fatherhood First Campaign

The time fathers spend with their children and the bond they establish have a tremendous effect on children's cognitive and physical development, as well as their social and emotional capacity. We at AÇEV advocate for fatherhood being the most important role of a father. To this end, we started our "Fatherhood First" campaign to create supportive environments for involved fatherhood in the families, neighborhoods, friend circles, and workplaces.

We contributed to the festive spirit across Turkey on Fathers' Day by combining the certification ceremonies with Fathers' Day activities in most cities. Across various regions in Turkey, fathers' groups conducted Fathers' Day activities on their own initiative or with support from local municipalities.

As part of our campaign, we created two short films to disseminate involved fatherhood messages over social media. The films were liked by many over a very short time, reaching high levels of interaction. Thanks to our communications efforts, we reached 2.524.185 people via traditional media and 5.215.623 through social media.

Moments of Fatherhood Exhibition with the Support of the Swedish Consulate General

With the "Moments of Fatherhood" exhibition conducted in various cities across Turkey over the year, we aimed to rethink current definitions of masculinity and fatherhood roles. We brought together selected pieces from Johan Bavman's exhibition "Swedish Dads," featuring Swedish fathers with their children during their paternity leave, with those of Ahmet Görsev

We created a series of research studies entitled "Understanding Fatherhood in Turkey," as part of our work on involved fatherhood.

and Zeynep Sezerman depicting various moments of fatherhood from Turkey. After a 3-day opening gala at the Nişantaşı Gallery of the FMV Işık Schools starting on 7 June 2017, the exhibition toured two shopping malls in Istanbul; as well as other galleries in collaboration with Eskişehir's Odunpazarı Municipality; Bursa Metropolitan and Nilüfer Municipalities; various municipalities in İzmir; Manisa; Ankara's Çankaya and Altındağ Municipalities. Since its launch, the exhibition met with 7500 visitors, touring 8 cities and 14 different locations for 110 days.

Fathers for Change Project in Collaboration with the Bernard Van Leer Foundation (BVLFF)

This project has the overall goal of providing the optimal environment for children to thrive through promoting the positive influence and role of the fathers. To this end, we aim to decrease behaviors and attitudes that can have a negative impact on child development by supporting fathers to strengthen democratic relationships in the home. The ultimate goal is to provide a supportive environment for children.

2017 EDUCATIONAL ACTIVITIES

Fatherhood in Turkey Research Study in Collaboration with the BVLF

We created a series of research studies entitled “Understanding Fatherhood in Turkey,” as part of our work on involved fatherhood.

The first publication of the series was the **Fatherhood in Turkey Study** in collaboration with the Bernard Van Leer Foundation. The study aimed to understand fatherhood and the dynamics behind it; identify the factors that influence fatherhood; examine the relationship between fatherhood and masculinity, and share the findings with all stakeholders. The findings demonstrate what kinds of obstacles intervene in the process of fathers becoming involved in child care and development. We shared the findings of the study with the public on 13 June 2017 at the panel titled “**Understanding Fatherhood in Turkey**” with the participation of the relevant target audience and media. We conducted other communications work on this study, as well. We built the messages of the “Fatherhood First” campaign, which took place simultaneously with the study, on our research findings. We depicted the kind of behaviors that could change the masculinity roles arising from the traditional family structure in Turkey. We also provided fathers with suggestions as to how they can spend time with their children. We shared the research findings with government representatives as well as local administrations.

AÇEV Discusses Involved Fatherhood with the Private Sector: Workshop with Support from the United Nations Population Fund

On 30 November 2017, we conducted a workshop with representatives from the private sector and agencies working on social responsibility projects across Turkey. Funded by the United Nations Population Fund (UNFPA), the workshop involved a discussion on the critical role of the private sector on involved fatherhood. The participants became volunteer ambassadors in their organizations to implement the suggestions created during the workshop. Furthermore, we prepared the manual titled “Supporting Involved Fatherhood in the Workplace,” based on our suggestions and outcomes reached during the workshop, and shared this manual with relevant stakeholders.

Father Trainings for Democratic Families in collaboration with the Yapı Kredi Bank

We reached 992 fathers in 77 Father Support Program groups opened in 2017 as part of our “Father Trainings for Democratic Families” project supported by the Yapı Kredi Bank. The project was implemented in Ankara, Afyon, Aydın, Balıkesir, Batman, Çanakkale, Denizli, Isparta, Kütahya, Konya, Manisa, Trabzon and Uşak. The program aims for lasting behavioral change in fathers, where fathers assume more responsibility in child care and development, and spend more time with their children. The program strives to support democratic family structures, ultimately serving to promote gender equality and its intergenerational transfer.

Women's Empowerment and Literacy Programs

Politics for Women: Empowerment through Representation (POWER) Project in collaboration with UN Women Fund for Gender Equality

With support from the UN Women Fund for Gender Equality, we launched a women's empowerment project in 2016 targeting young women's increased participation in decision making. In this 3-year project, we aim for young women aged 15-35 with limited access to education and other resources to build on their advanced literacy skills, as well as knowledge, awareness, and skills related to participation in decision-making at the home, neighborhood, and district level. We prepared a new development program for young women, namely POWER. We also developed content for awareness raising seminars targeting men. With the POWER Sessions conducted as part of this project, we aim to reach young women aged 15-35.

POWER Sessions

In 2017, we conducted the POWER Program for young women's development in Istanbul, Bursa, and Izmir. In this project, as we developed POWER as a new adult education program, we collaborated with local administrations, NGOs, and government agencies. We conducted a total of 67 POWER groups and 40 play rooms for the children of participating women. Through POWER sessions we reached **620** young women aged 15-35, who have dropped out of school or had to quit formal schooling. **Three hundred and three children** participated in play room activities, while their mothers were attending POWER sessions. Through training of trainers and refresher trainings for existing trainers, 62 new play room volunteers and 100 new POWER volunteer trainers joined our team. Furthermore, we conducted trainings on gender equality for our volunteer trainers.

Throughout the year, we worked with our academic consultants and started a new program within this project called 'Community Leaders' in Istanbul.

2017 EDUCATIONAL ACTIVITIES

Supporting the main project, we conducted ancillary projects thanks to support from Bank of America and C&A:

Financial Literacy Program with support from Bank of America

Throughout 2017, we opened 15 groups (Advanced Literacy, Basic Literacy, and POWER Program) in İstanbul, Bursa and İzmir. To support women's continued participation in these programs, we opened 10 play rooms, ultimately reaching 200 women and 75 children.

Furthermore, we conducted a financial literacy seminar with the participation of 57 women. In this seminar, volunteering Bank of America employees shared with participating women important practical information, such as basic financial concepts, the time value of money, the importance of savings, and retirement funds.

POWER Program Implementation with support from C&A

In İstanbul and Bursa, we started 5 POWER groups with 2 play rooms, reaching 53 young women and 15 children. Within the same project, we reached 14 new volunteers through training of trainers for the play rooms on 6-10 November 2017.

City Tours with support from Benefit

We organized city tours with young women attending the POWER Program with support from Benefit. These tours were informative and encouraging cultural activities, where POWER's young women had the opportunity to participate in the social sphere. As part of this project, which involved activities that would enable these young women to familiarize themselves better with the city they live in, we conducted a total of 29 city tours. Three hundred and twelve young women and 75 children participated in these tours. In addition

to social activities, such as going to the cinema and watching a basketball game, we visited the Women's Library, as well as the Sabancı and Rahmi Koç Museums. We also conducted cultural tours of the cities. We visited Bornova Women's Cooperative and Kitchen of Women's Labor.

Monitoring and Evaluation

In addition to classroom observations and evaluation meetings with volunteers, we collected data from the field and conducted an impact evaluation with the YADA Foundation. Researchers at YADA Foundation administered pre- and posttests with the POWER Program participants. The researchers also monitored advancements in the literacy levels of the participants in a similar pre- and posttest format.

In the meantime, we followed and supported the participants' efforts towards formal education. We observed that 35 women took the exam for their elementary school diploma and 28 went on to enrolling to middle (junior high) school. Furthermore, we supported the volunteers through solidarity meetings.

Advanced Literacy and Basic Computer Programs

Our volunteers opened 24 Basic and 9 Advanced Literacy courses in 5 provinces (İstanbul, Ankara, İzmir, Gaziantep and Mardin) reaching 492 women. Furthermore, with the Basic Computer courses opened in İstanbul and Ankara, six of which were opened at the MEK Education and Culture Center we reached 93 women.

Acevdeokuyaz.org

We introduced our "Acevdeokuyaz.org" web portal to our POWER Program participants and encouraged its use. Planning for new partnerships continues to ensure sustainability of the portal.

Work on Gender

In our educational activities, AÇEV draws attention to the socialization of gender roles in the early stages of life. To this end, we have conducted seminars for private sector employees aiming to increase awareness and knowledge on this issue in the corporate world. We discuss gender with the private sector within the framework of our experience in child development, drawing attention to egalitarian parenting and adult roles in breaking the gender roles that have been internalized from childhood into adulthood through environmental influences.

“I Support Gender Equality” Project in collaboration with the KOÇ Holding

Our partnership with the Koç Holding on project “I Support Gender Equality for My Country,” aimed to create awareness on and sensitivity towards gender, encouraging the employees of the Koç Corporation to contribute to gender equality in the home, the workplace and in social life. Our work, from 2015 to 2017, involved the below seminars and workshops that were based on a needs assessment:

- Two-hour general Informational Seminars for all employees
- One-day awareness workshops on how inequality is experienced in everyday life
- Three-day training of trainers for volunteers who aim to be agents of transformation within the corporation

During the project, we reached a total of 7000 participants through 59 seminars in 24 Koç Group companies and vendors. With supervisory support from our field advisors, close to 200 Koç Group volunteer employees were trained as trainers. These volunteer trainers reached a total of 65000 colleagues through

seminars in their own companies. Sixteen AÇEV trainers also reached 606 Koç Group employees through 36 awareness workshops.

Employees of the Koç group, who attended these workshops, made a pledge to take action on issues involving gender-equitable language, disseminating gender equality to others, child rearing, interpersonal relationships in adulthood, and distribution of household responsibilities. The results of the project evaluation demonstrate highest impact on the volunteer trainers, where 73% realized their gender discriminatory behaviors prior to the training.

We also observed significant attitude change in the participants regarding the negative impact of gender roles, gender discriminatory parenting attitudes, and the positive impact of gender equality on both women and men.

Project Activities in 2017

The final year of the project involved implementation of the Insight Workshops. After content development for the Insight Workshops that aim to create a deeper understanding of gender roles, we conducted a capacity building training with a newly created team of 16 AÇEV experts. The expert team conducted 38 workshops in 21 companies, reaching 637 people.

“I Support Gender Equality” Project with Ford Otosan
As part of our project with the Koç Group, we conducted a training of trainers with 67 volunteer trainers from 28 vendors working with Ford Otosan. In the companies participating in this training, our trainers reached 462 people through 6 seminars. Following these seminars, the companies started supervision with their volunteer trainers and support from the AÇEV team.

The final year of the project involved implementation of the Insight Workshops.

2017 EDUCATIONAL ACTIVITIES

International Work

Implementations

Our programs were implemented in **Saudi Arabia, Laos** and **Brazil**. In 2017, we worked towards high quality dissemination of our program partnerships in line with our common goals.

Saudi Arabia

We conducted a training of trainers for the implementation of our Mother Child Education Program with the participation of educators from the Child Care Association (CCA) of Saudi Arabia, as well as the Ministry of National Education, Social Services, and National Security. We also conducted a refresher training with the existing 50 trainers, who have actively implemented the program for the last 4 years, updating them on our revised program content that involves the three focal themes of prevention of domestic violence, child protection, and peace. Following the translation of the revised program into Arabic, we conducted another trainers' training in 2017. We also trained 7 of our experienced trainers as "master trainers," enabling them to supervise the implementing trainers, which served to strengthen field operations. We specified our role in Saudi Arabia as supervision and development support for all trainings of trainers to be conducted by CCA through observational visits.

Laos

Implemented in Laos since 2014, our Summer Preschools Program continued implementation in 2017 in collaboration with PLAN International. The program is implemented as part of the LEARN Project, a 3-year research project funded by Dubai Cares. The project, which is based on a good quality scale-up model for access to preschool education, started in the villages of the Bokeo province of Laos populated by the most

disadvantaged families and children in the country. In 2017, we worked towards transferring the program over to the Ministry of National Education in Laos. In the summer of 2017, AÇEV's Summer Preschool Program, conducted by PLAN International in collaboration with the Laos Ministry of National Education, was implemented in 40 schools in 2 different provinces (Bokeo and Luang Prabang) by the trainers of PLAN International and Save the Children. AÇEV's master trainers provided support to those of PLAN International and Save the Children by attending the training of trainers and supervisors in Laos in May 2017.

Brazil

Implementations of the Mother Child Education Program in collaboration with the Sao Paulo Federal University continued in 2017. The program implementations started with the first training of trainers in 2016 and continued with the second in February 2017, where 15 new trainers joined the team. Having reached 200 mothers in 2017, we aim for a sustainable scaling up of the program in Brazil in the coming years. To this end, we continue to work towards building partnerships and scaling up.

International Impact Evaluations

This year, we reached the final stage of the impact evaluation of the Mother Child Education Program implemented in the Palestinian Refugee Camps in Lebanon by the Arab Resource Collective. Our collaborator, Yale University, conducted the data analyses. We also created a research team for impact evaluation of the revised Mother Child Education Program in Saudi Arabia, with its newly added 3 focal themes of prevention of domestic violence, child protection, and peace. We aim to reach 300 mother-child dyads in the impact evaluation of the program in Brazil, which is at its data collection stage, conducted in collaboration with the Sao Paulo Federal University.

International Case Studies

In 2017, AÇEV's work was showcased by Harvard University as a case study. The case study, written by Harvard University's prominent human rights professor, Dr. Jacqueline Bhabha, was initially offered to undergraduate, graduate, and Executive Education students at the Harvard School of Public Health Child Protection Program. Our work was thus featured on an international academic platform, and the significance of AÇEV's emphasis on an evidence base and collaboration was once again underscored.

International Partnerships

World Forum Alliance

AÇEV has been a member of the World Forum Alliance since 2008. World Forum Alliance aims to contribute to access to and quality of early childhood services through promoting global information exchange.

International Step by Step Association (ISSA)

With its global members, ISSA conducts work on early childhood. The association aims for young children to access good quality services in education and care.

United Nations Economic, Social and Cultural Organization (UNESCO)

Our collaboration with UNESCO started in 1997, when AÇEV became UNESCO's Early Childhood Cooperation Center- Central Asia Representative, and continued in 2012 when we received Consultative Status. AÇEV provides consultancy on its areas of expertise, early childhood and adult education, helping to improve work done in these areas through its know-how and expertise.

United Nations Economic and Social Council (ECOSOC)

With the Special Consultative Status, AÇEV acquires the right to provide recommendations to general assemblies, members, and relevant specialized institutions of the United Nations; directly attend UN conferences and preliminary meetings; attend meetings of councils and commissions; be informed and comment on the agenda; issue written statements and conduct oral presentations.

United Nations Millennium Development Goals (MDG)

Since 2009, AÇEV contributes to the Millennium Development Goals through updated annual reports on its pledge in the field of education.

The Consultative Group on Early Childhood Care and Development (CGECCD)

Based on the importance of early childhood, CGECCD implements programs and conducts research on health, nutrition, education, social sciences, economy, and child protection as related to this stage of life.

Harvard University Center on the Developing Child (CDC)

AÇEV is a founding member of the Harvard University Center on the Developing Child (CDC), since its establishment in 2006. CDC conducts research and advocacy in early childhood education and development.

Yale University Child Study Center, MacMillan Center

In 2012, AÇEV started an academic collaboration with the Yale Child Study Center and the MacMillan Center for International and Regional Studies.

2017 EDUCATIONAL ACTIVITIES

AÇEV-Supported Centers

Alipaşa Family and Child Education Center Supported by Boeing Turkey

At the Alipaşa Family and Child Education Center located in Diyarbakır, we reached 118 mothers and 52 children in the first half of 2017 through our Mother Support Program and Preschool Education Program.

We supported the development of children in this region in partnership with local organizations through reading groups with 4-7-year-olds. In the second half of 2017, we reached 2564 children through 145 reading groups. Due to urban transformation work in the region, we started preparations to move to a new building in 2018.

Melek Erman Köni Education and Culture Center (MEK) Supported by Boeing Turkey

In the summer of 2017, we conducted the Summer Preschools Program with 30 children at the MEK Education and Culture Center in Esenler, Istanbul. As part of the Summer Preschools, we conducted art workshops at the İstanbul Modern named 7 mothers / 7 children. Also during summer months, 98 students from the MEK Center participated in workshops and sports activities at TEGV's Ferit Aysan Education Park.

All of AÇEV's educational programs were implemented at the center, and our educational experts paid supervision visits to each of the programs. As part of the preschool classroom with its 34 students, we conducted trainings and meetings with parents. All women participating in programs at the center were provided with the Basic Computer Program. We also implemented our POWER Program at the center.

iz Child Development Center

In 2017, a total of 63 children participated in the preschool and summer preschool programs. We

continue to provide consultancy and support for the preschool education and play rooms at the center, conducting seminars for the teachers, as well as the parents.

Kınık and Poyracık Family and Children's Centers Supported by HSBC

At the Kınık Municipality's Family and Children's Center, where we implement our programs, we reached 62 children in 4 Summer Preschool classrooms. Furthermore, 27 mothers participated in the Mother Support Program. Seventy-two children and 15 mothers made use of the child-parent library we established inside the center.

At the family center in the Poyracık village of Kınık, we reached 63 children in 6 Summer Preschool classrooms. In 2 Mother Support groups, we reached 30 mothers. A hundred and twenty-four children and 20 mothers made use of the child-parent book and toy library. HSBC volunteers conducted arts and crafts workshops at the center, such as wood painting, pottery with colored powder, and flower planting.

FUNDRAISING & DEVELOPMENT

“TOGETHER, WE ARE STRONGER”

In collaboration with the Step by Step Platform (Adım Adım, AA) of philanthropic running, we started a fundraising campaign for our Reading for the Future program at the November 2016 Istanbul Marathon. The campaign gained great momentum at the March 2017 Runatolia - Antalya Marathon and was successfully completed at the Bozcaada Marathon in May. Over the 3 marathons, the campaign collected over 295000 TL from 13 corporations and 260 marathon runners, enabling 1642 children to participate in the Reading for the Future program. At the November 2017 Istanbul Marathon, as part of our “Fatherhood First” campaign, 298 fathers had the opportunity to attend our Father Support Program with support from 128 philanthropic marathon runners.

We organized a football tournament, named Girls on the Football Field, at the Boğaziçi University Uçaksavar Stadium to provide support for the Father Support Program. The proceeds from the ticket sales for the tournament, which happened in May, were donated to Boğaziçi University and AÇEV’s Father Support Groups. As AÇEV, we participated in the tournament with our own team, as in 2016, and raised awareness on the importance of involved fatherhood.

PepsiCo raised awareness on the importance of involved fatherhood through the “Pepsi-AÇEV father-daughter football game,” also raising funds for our Father Support Program.

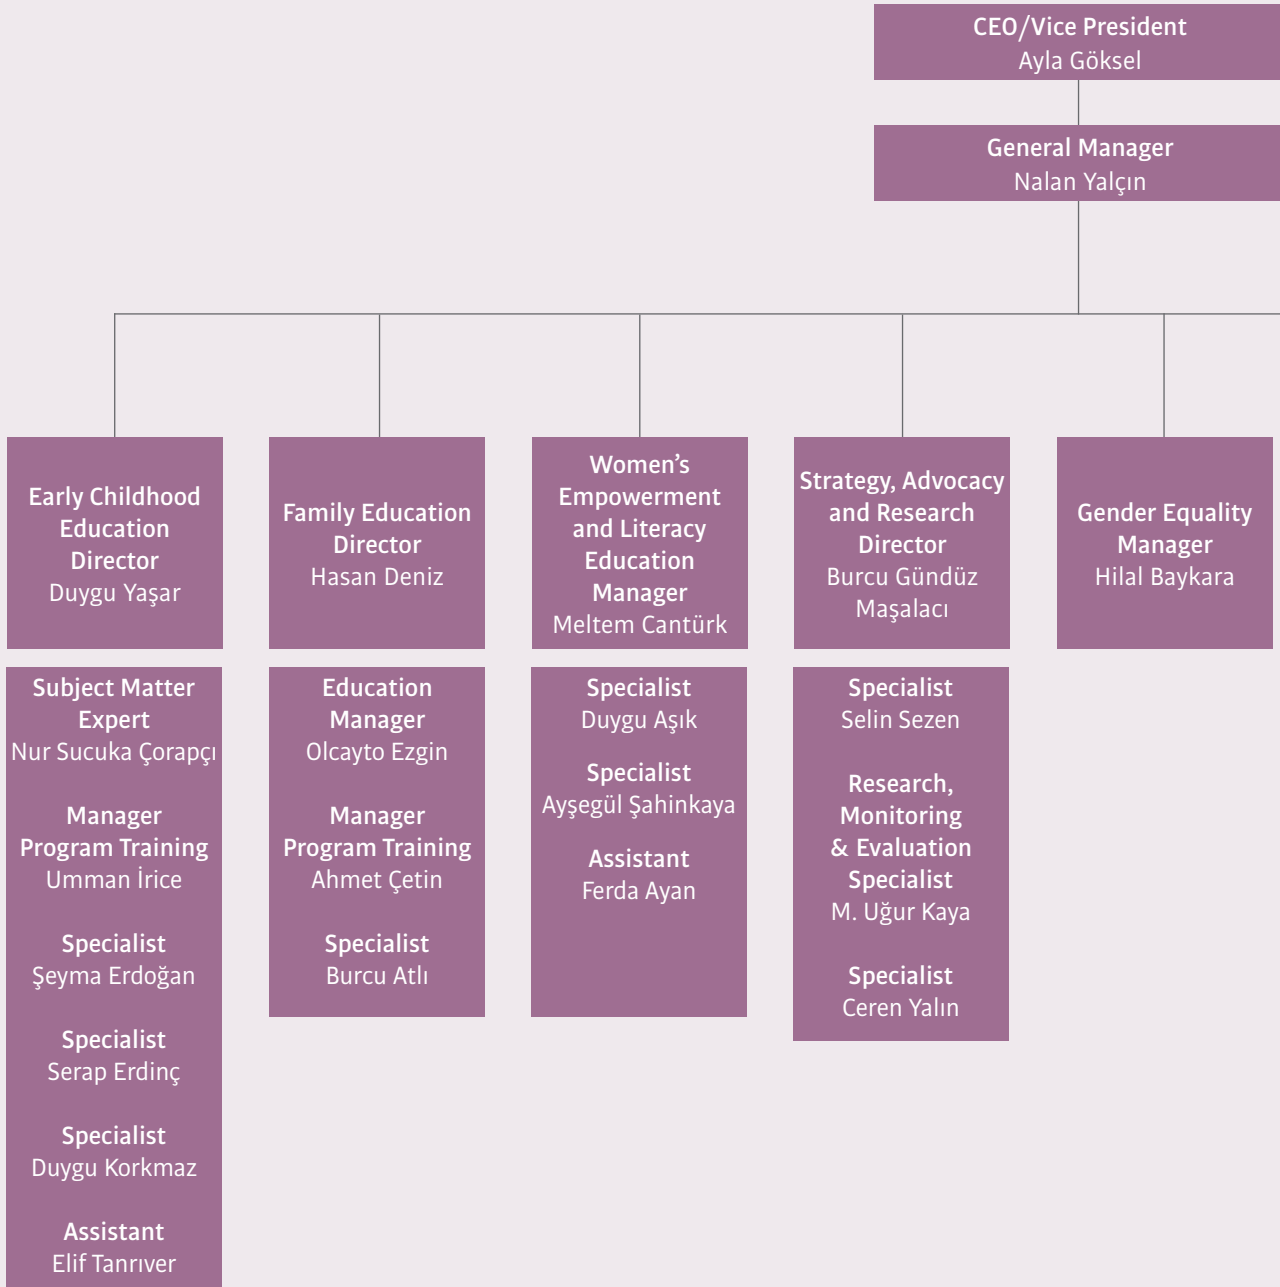

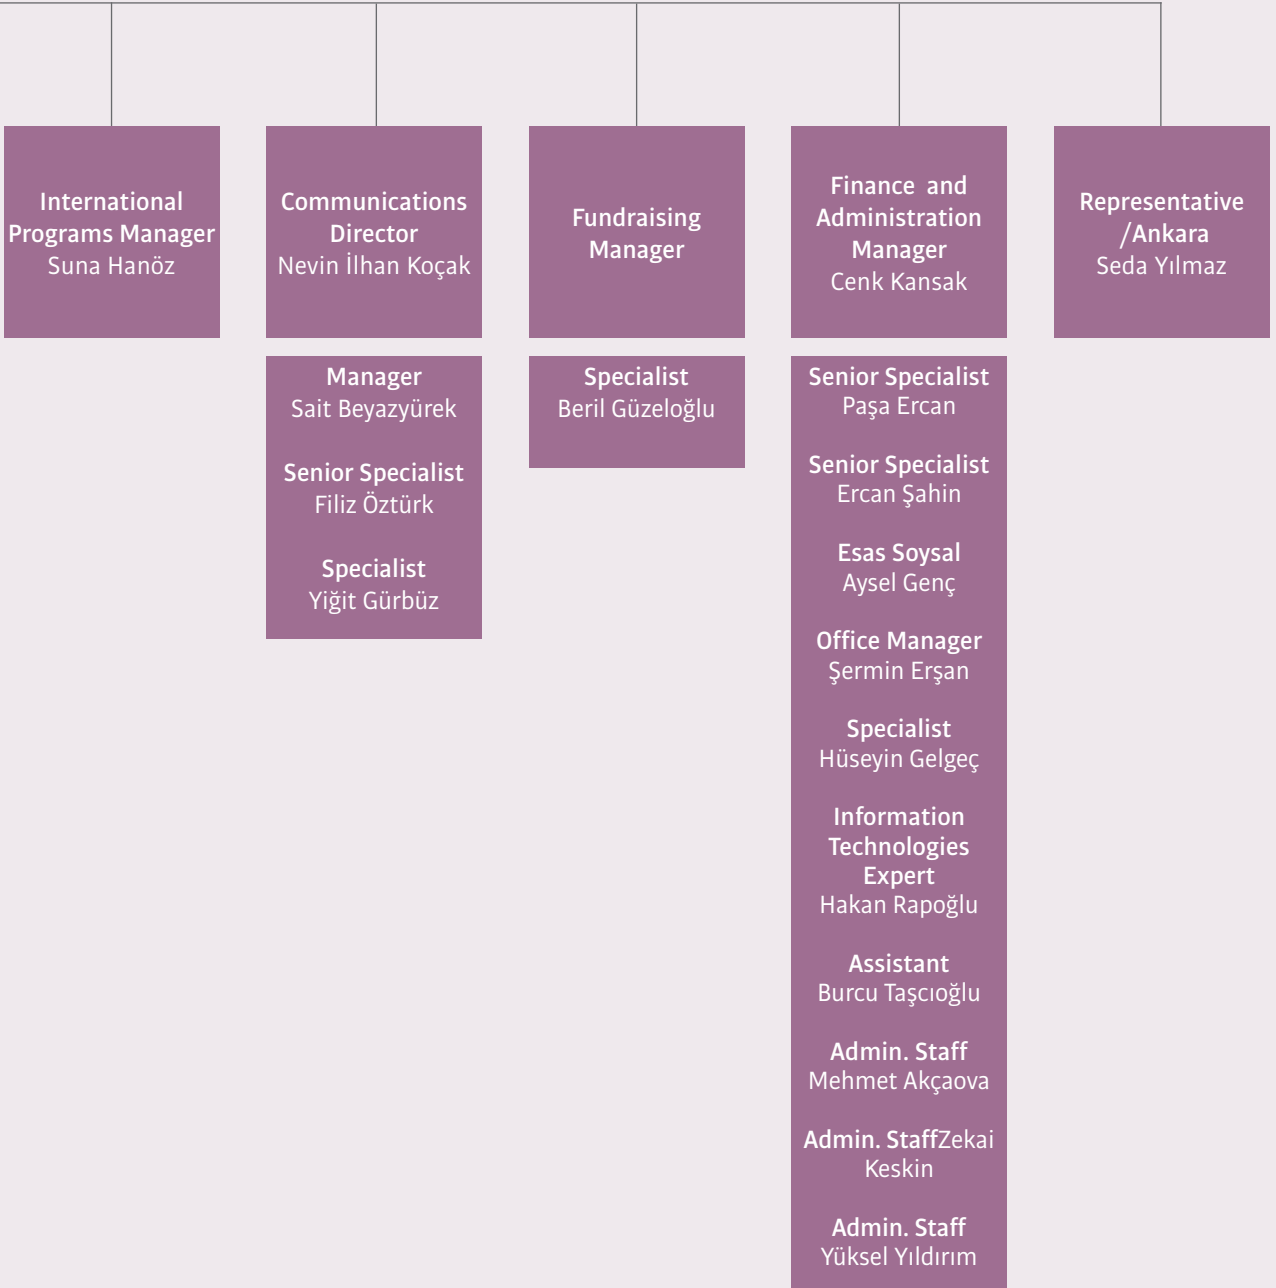

Swissotel raised funds at ACCOR Hotel’s 50. anniversary brunch, donating the proceeds to AÇEV, which also served to increase our visibility.

In partnership with ARPR Communications, for the second time we participated in the Deniz Kızı (Mermaid) National Sailing Tournament, which aims to increase women’s participation in sailing, where the tournament donated its proceed to AÇEV’s mother and early childhood programs.

2017 ORGANIZATION CHART

HUMAN RESOURCES

At the heart of AÇEV's success as an institution lies a dedicated team, striving to contribute to social development with its experience and know-how.

As of the end of 2017, AÇEV has human resources capacity of 137 people, with 65 being full-time and 72 part-time staff.
